<b>Line of Flight Rule:</b> A player may drop a ball behind the hazard (water or out-of-bounds), keeping the point at which the original ball last crossed the margin of the hazard or out-of-bounds entry directly between the hole and the spot on which the ball is dropped. In determining this line, the player must first determine where the ball last crossed the margin of the hazard or out-of-bounds entry. Once this point is determined, the player should draw an imaginary line from this point to the hole. The player may then drop the ball anywhere along an extension of this line behind the hazard or out-of-bounds entry. NOTE: Line of Flight is where the ball crosses the Out-Of-Bounds area. Not where the ball landed, Keith Hammer! Keith, Mike made me to do it!
